Cintra & Equinix - Stream Sponsor: Cloud and Procurement

Jointly, Equinix and Cintra enable businesses with mission-critical Oracle workloads to accelerate their journey to cloud, while minimizing transition risks. By combining Equinix's global data centre and interconnection services with Cintra's award-winning architecture expertise, we ensure you can increase your agility and reach. All of which is supported by the highest levels of performance and resilience.

We deliver a custom-built, commercially sustainable roadmap for your journey to cloud, informed by a comprehensive assessment of your business needs and our pre-defined reference architectures. Together, we remove complexity, reduce risk and lower costs.
